CRITERION – I
CURRICULAR ASPECTS

1.1.1 The Institution ensures effective curriculum delivery through a well planned and documented process

Curriculum Planning and Delivery

Adithya Institute of Technology offers seven undergraduate and five postgraduate programs in Engineering, Technology, and Management, following the curriculum and syllabus designed by Anna University. To ensure structured curriculum delivery, the institute employs a systematic approach to planning and documentation, fostering a learning environment that equips students to address personal and societal challenges.

Course File and Lecture Plan

Once courses are allocated, faculty members prepare a comprehensive course file for each subject. This includes a lecture plan aligned with the academic calendar and guidelines from Anna University and the institution. The plan details the schedule for content delivery, tasks, and Continuous Internal Evaluation (CIE) activities, such as assessments and quizzes, ensuring effective curriculum delivery and academic progress tracking.

Curriculum Delivery and Monitoring

The institution emphasizes quality education through traditional and modern teaching methods, including lectures, seminars, and technology-enabled learning tools. ICT-equipped classrooms facilitate interactive learning with PowerPoint presentations and video lectures. Tutorials encourage active participation, while the upgraded Learning Management System (LMS) enhances delivery. Regular student feedback is analyzed to refine teaching methodologies and evaluation processes, ensuring continuous improvement in education quality.

1.1.1 THE INSTITUTION ENSURES EFFECTIVE CURRICULUM DELIVERY THROUGH A WELL-PLANNED AND DOCUMENTED PROCESS
