

CRITERION – II

TEACHING LEARNING AND EVALUATION

2.3.2 - Teachers use ICT enabled tools for effective teaching-learning process.

To enhance the learning experience and provide a better user experience, state-of-the-art educational technologies are integrated into the teaching-learning process. The campus is equipped with optical fibre cable connectivity and Wi-Fi access in all areas, ensuring quick and easy access to both intranet and internet resources. Faculty members utilize the Learning Management System (LMS), online educational resources, social networking sites, and blended learning platforms to effectively deliver lectures and improve student engagement. ICT tools are extensively used by faculty to teach and train students, facilitating a dynamic and interactive learning environment.

Each department is equipped with LCD projectors, which are used to screen educational videos and deliver PowerPoint presentations. The use of ICT not only helps students stay in tune with the digital and virtual world but also supports a student-centric approach to learning. Social media platforms, such as WhatsApp and Google Meet, are employed for communication, sharing study materials, announcing updates, conducting tests, uploading assignments, and addressing queries.

Additionally, the college website provides access to LMS (<http://lms.adityatech.edu.in/>), offering e-content and study materials for various courses, further strengthening, and making learning more effective for students. This comprehensive use of technology ensures an enriched, interactive, and accessible learning experience.

2.3.2 TEACHERS USE ICT ENABLED TOOLS FOR EFFECTIVE TEACHING-LEARNING PROCESS.
